

See Where Your Systems Are Slowing You Down

Every restaurant operation relies on multiple systems, but it's how those systems work together that determines efficiency.

Integrations

This checklist walks you through the key integration points across your workforce technology, helping you understand where your data is aligned and where gaps may be impacting performance.

Payroll & Accounting

- ☐ Payroll journal entries post automatically to accounting
- ☐ Labor costs flow into accounting without manual entry
- ☐ Accounting teams spend less than 15 minutes processing payroll entries
- ☐ General ledger mapping is fully automated
- ☐ Payroll reports reconcile automatically with GL

POS & Time Data

- ☐ POS hours automatically import into payroll
- ☐ Tip calculations are fully automated
- ☐ Managers do not manually re-enter time data
- ☐ Break and overtime rules are applied automatically
- ☐ Payroll data connects to labor and sales reporting

Benefits Administration

- ☐ Benefits eligibility syncs automatically with HR status
- ☐ Terminated employees are removed from benefits automatically
- ☐ Enrollment data flows between systems without manual entry
- ☐ ACA eligibility tracking is fully automated
- ☐ Benefits cost reporting ties directly to payroll

Workforce Data Architecture

- ☐ Employee information is entered only once
- ☐ HR, payroll, and benefits share the same database
- ☐ Reporting pulls from a single data source
- ☐ Employee status updates flow across all systems automatically
- ☐ New hire data flows end-to-end without re-entry
