

Avoiding the hidden cost of broken HCM integration hand-offs

Managing HCM systems requires multiple integrations, where a single data sync error can cause compliance fines, delayed paychecks, and stalled onboarding. IntegrationPulse is a self-served health and monitoring dashboard that provides full visibility to troubleshoot faster.

84%

of organizations run 20+ integrations for a single payroll.

Deloitte Global Payroll Benchmarking Survey, 2025.

01

Know what's connected

See active integrations in real time.

02

Optimize integration runs

Use call frequency and run time to plan how each integration runs

03

Resolve errors faster

Find the details you need to troubleshoot integration errors.
