

It takes too many reports to get the result you need

Countless reports are generated daily across payroll and HR systems, making it difficult to manage them all, let alone get the results you need. SmartReport is a self-served reporting workspace that ensures you get the results you need and when you need them.

3,000+

searchable fields to build any report, no specialist required.

01

Generate every report in one view

- Run industry-standard reports
- Group and run reports together
- Use simple controls for formatting and outputs

02

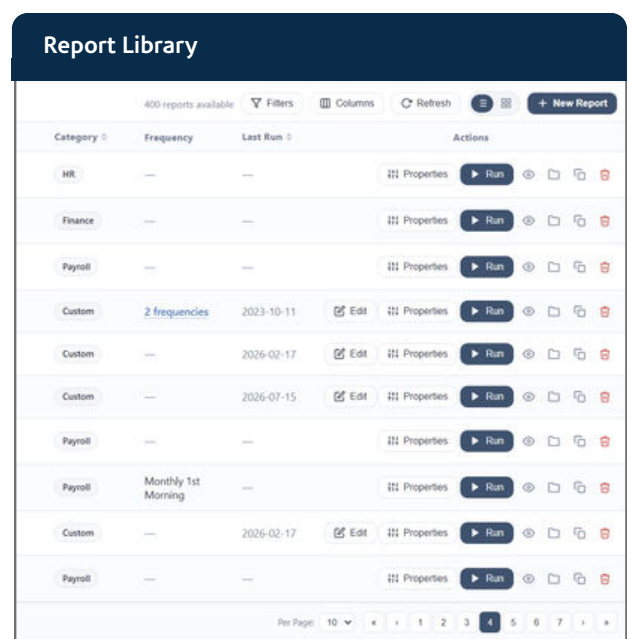

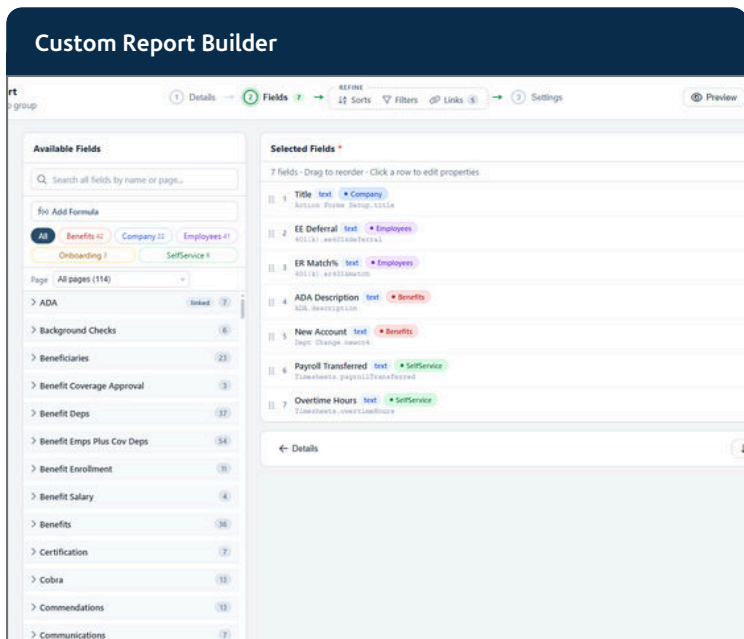

Customize reports without support

- Build easily with guided steps
- Choose from 3,000+ fields
- Utilize AI-assisted prompts

03

Capture the status of every report

- Search and filter reports easily
- Track report runs and frequency
- Know active, expired, and disabled reports

Use Cases

For payroll administrators

- Run every payroll-close report from one page, without switching screens

For HR managers

- Build a headcount report for leadership the same afternoon

For controllers

- Run the full month-end pack in one click against a single date range
